

# Origami Dory

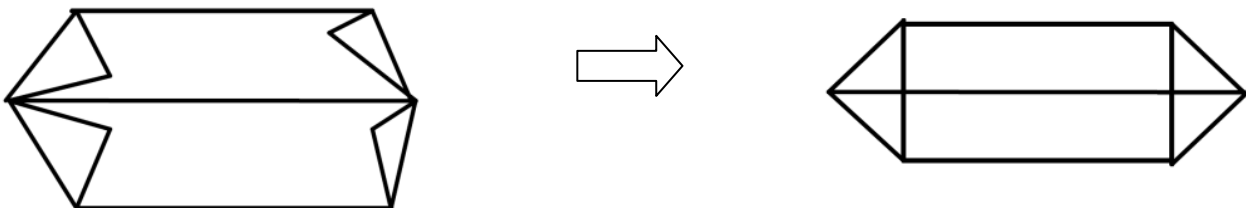

**Step 1:** Start with a square sheet of paper. Crease down the center and unfold.

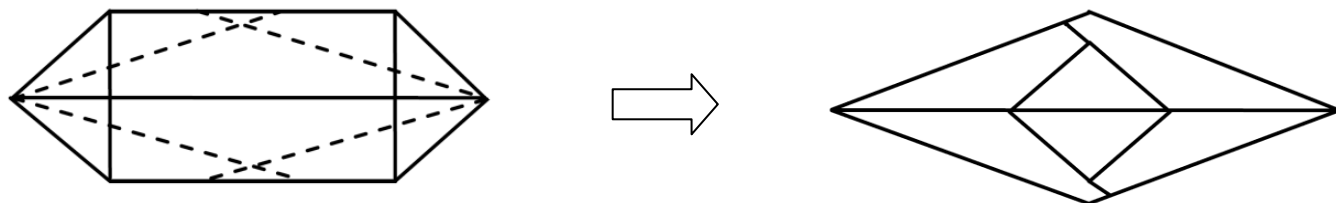

**Step 2:** Fold in edges to meet the center crease.

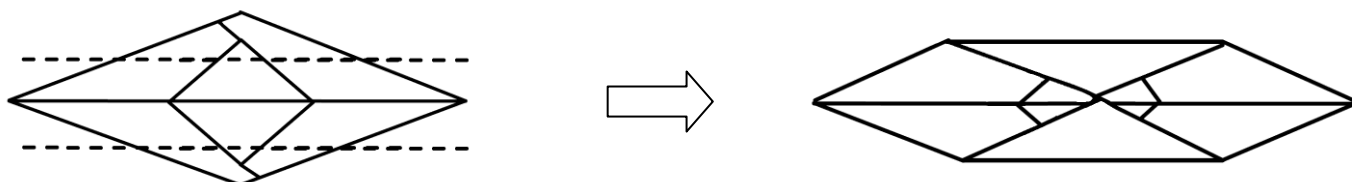

**Step 3:** Fold in all four corners so the edges meet the center crease.

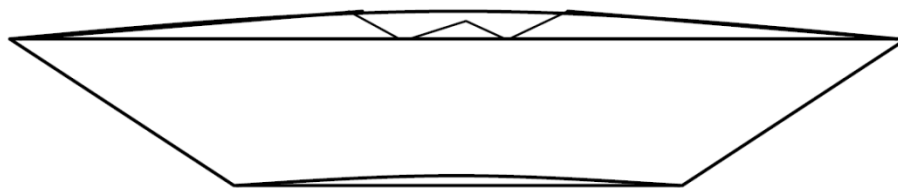

**Step 4:** Fold all four “wide” corners so the **edges** meet the center crease. Some of the folds will overlap.

**Step 5:** Fold in the two “wide” **points** to meet the center.

**Step 6:** Open up from the middle. **Carefully**, turn the boat inside out, starting at one end and moving to the other. Shape by creasing bottom edges.

***Congratulations!***

Your dory is complete, and will float in water!  
Cover the outside with tape for extra waterproofing.
